

A young boy with blonde hair and glasses is looking at a colorful ball-and-stick molecular model. The model consists of various colored spheres (red, blue, yellow, purple, black, white) connected by sticks, representing a complex chemical structure. The background is a blurred white wall with some papers or posters.

The Doctor

Who is there to
diagnose the
problem and
administer the
drug to cure the
ailment

A young boy with dark hair, wearing a light blue shirt, is smiling and looking upwards. He is holding a large, white paper airplane against a clear blue sky. The airplane is positioned diagonally across the frame, with its wings extending towards the top corners. The boy's face is in the lower-left corner, and his right arm is raised, holding the fuselage of the airplane.

The Travel Agent

Who gives advice to help find the best route to arrive at the destination (achieve the objectives)

The Detective

Who leads an investigation to examine evidence of change or results

A young boy and girl are reading a book together in a library. The boy is holding the book, and the girl is pointing at a page. The book is titled "Famous Americans" and "Africa".
